

Professional Cleaning Operator Certifications (IR4.0)

CPD Programme (Short Course)

What is CPD?

Continuing professional development (CPD) is the intentional maintenance and development of the knowledge and skills needed to perform in a professional context. This could mean honing current skills, it could mean developing them to a new level, or it could mean learning new ones that will allow an employee's job role to expand or prepare them for potential promotion.

CPD activities can range from formal educational activities such as instructor-led training courses, workshops or seminars, to more informal approaches such as work-based learning or mentoring. CPD can also include self-directed study such as e-learning courses and structured reading.

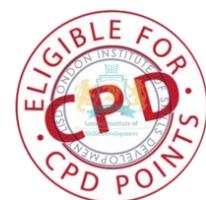

CPD can be provided by specialist companies (e.g. commercial training providers, independent coaches), or provided internally, in particular by larger organisations.

Course Objectives

This course educates on the proper cleaning techniques, so they are empowered to work more proficiently and consistently. Utilizing industry-best practices and the latest equipment and product innovations, employees can do more during a shift, increasing productivity while reducing labour costs.

Learning Outcomes

Employees will present with the basics of general cleaning skills, hygiene management and understand the cleaning best practices regardless of the task or surface that he/she is assigned to clean.
